P 110 19 NOV 1332 Oblique NO Sweepwing A/c

There is one Twin engine

Transport which appears
 similar to The Soviet CRATE.

The similarity of The CRATE
 and The US C131, which is also
 used by Commercial airlines, both
 in size and appearance make
 identification impossible. The
 image of this aircraft is on
 oblique photography.

Five Gloster Meteors are parked
 near the hangars. These aircraft
 are Twin jet fighters and may
 possibly have been identified
 as BEAGIES. Five Meteors are
 on the field.

34 aircraft counted

Material under Sov. Rev.
